Waterproof and Water Repellent Textiles and Clothing

Edited by John T. Williams
Waterproof and Water Repellent Textiles and Clothing
Incorporated by Royal Charter in 1925, The Textile Institute was established as the professional body for the textile industry to provide support to businesses, practitioners and academics involved with textiles and to provide routes to professional qualifications through which Institute Members can demonstrate their professional competence. The Institute’s aim is to encourage learning, recognise achievement, reward excellence and disseminate information about the textiles, clothing and footwear industries and the associated science, design and technology; it has a global reach with individual and corporate members in over 80 countries.

The Textile Institute Book Series supersedes the former ‘Woodhead Publishing Series in Textiles’, and represents a collaboration between The Textile Institute and Elsevier aimed at ensuring that Institute Members and the textile industry continue to have access to high calibre titles on textile science and technology.

Books published in The Textile Institute Book Series are offered on the Elsevier web site at: store.elsevier.com and are available to Textile Institute Members at a substantial discount. Textile Institute books still in print are also available directly from the Institute’s web site at: www.textileinstitute.org

To place an order, or if you are interested in writing a book for this series, please contact Matthew Deans, Senior Publisher: m.deans@elsevier.com

Recently Published and Upcoming Titles in The Textile Institute Book Series

*Antimicrobial Textiles*, Gang Sun, 9780081005767

*Active Coatings for Smart Textiles*, Jinlian Hu, 9780081002636

*Advances in Women’s Intimate Apparel Technology*, Winnie Yu, 9781782423690

*Smart Textiles and Their Applications*, Vladan Koncar, 9780081005743

*Advances in Technical Nonwovens*, George Kellie, 9780081005750

*Activated Carbon Fiber and Textiles*, Jonathan Chen, 9780081006603

*Performance Testing of Textiles*, Lijing Wang, 9780081005705

*Principles of Textile Finishing*, Asim Kumar Roy Choudhury, 9780081006467

*Forensic Textile Science*, Debra Carr, 9780081018729

*Crazing Technology for Polyester Fibers*, Victor Goldade and Nataly Vinidiktova, 9780081012710

*Natural Dyes for Textiles*, Padma Vankar, 9780081012741

*High-Performance Apparel*, John McLoughlin and Tasneem Sabir, 9780081009048

*Sustainability in Denim*, Subramanian Muthu, 9780081020432

*Fibrous Filter Media*, Philip Brown and Christopher Cox, 9780081005736
The Textile Institute Book Series

Waterproof and Water Repellent Textiles and Clothing

Edited by

John Williams
# Contents

**Contributors** xi

**Part One Principles of waterproofing and water repellency in textiles** 1

1 **Introduction to waterproof and water repellent textiles** 3
   *Carmen Loghin, Lumița Ciobanu, Dorin Ionesi, Emil Loghin, Irina Cristian*
   1.1 Introduction 3
   1.2 Areas of application of waterproof and water repellent textiles 4
   1.3 Basic aspects regarding waterproof and water repellent textiles 11
   1.4 Conclusions 22
      References 22
      Further reading 24

2 **Development of waterproof breathable coatings and laminates** 25
   *Hikmet Ziya Özak*
   2.1 Introduction 25
   2.2 History of waterproof and breathable fabrics 27
   2.3 Basics of waterproof breathable fabrics for comfort 30
   2.4 Behaviour of waterproof breathable fabrics 35
   2.5 Classification of waterproof breathable fabrics 44
   2.6 Waterproof breathable fabric structures 47
   2.7 Methods of developing waterproof breathable fabrics 58
   2.8 Arrangements of layers at waterproof breathable clothing construction and review of commercial products 61
   2.9 Conclusions and future trends 65
      References 67
      Further reading 72

3 **Soil repellency and stain resistance through hydrophobic and oleophobic treatments** 73
   *Silvia Pavlidou, Roshan Paul*
   3.1 Introduction 73
   3.2 Soil repellency and stain-resistance mechanism 74
7 Silicone-based water repellents 153

Hikmet Ziya Özék
7.1 Introduction 153
7.2 Characteristics of silicone water repellents 155
7.3 Methods of silicone applications for developing water repellent fabrics 161
7.4 Durable water repellents and silicone 163
7.5 Performance of silicone-treated water repellent fabrics 167
7.6 Environmental and health aspects of silicone water repellent 169
7.7 Review of commercial products and future trends 171
7.8 Conclusions 184
References 185
Further reading 189

8 Dendritic molecules and their use in water repellency treatments of textile materials 191

Riza Atav
8.1 Introduction 191
8.2 Historical background of dendritic molecules 194
8.3 Classification of dendritic molecules 194
8.4 Structure of dendrimers 195
8.5 Synthesis of dendrimers 197
8.6 Types of dendrimers 200
8.7 Properties of dendrimers 205
8.8 The use of dendrimers in water repellency treatments of textile materials 207
8.9 Conclusion 211
References 211

9 Plasma-based treatments of textiles for water repellency 215

Nicholas W.M. Edward, Parikshit Goswami
9.1 Plasma treatments 215
9.2 Plasma treatment for materials 216
9.3 Surface modification with plasma 218
9.4 Hydrophobic and hydrophilic materials 219
9.5 Water and oil repellency 221
9.6 Plasma treatment of textiles to confer hydrophobicity 223
9.7 Nanoparticle deposition via plasma treatment 225
9.8 Plasma treatment and fibre surface nano-roughness 226
9.9 Silicon chemistry in plasma 227
9.10 Multifunctional plasma treatments 228
9.11 Summary 228
9.12 Sources of further information and advice 229
References 229

Part Three Water repellent textiles in practice:
Performance, testing and applications 299

12 | Designing waterproof and water repellent clothing for wearer comfort—A paradigm shift | 301 |
| Jeni Bougourd, Jane McCann | 12.1 Introduction | 301 |
| 12.2 The circular economy: Avoiding waste and damage | 302 |
| 12.3 Design of waterproof and water repellent clothing within a circular economy | 305 |
| 12.4 Policies and goals for designing sustainable waterproof clothing | 306 |
| 12.5 The design concept | 307 |
| 12.6 Co-design | 308 |
| 12.7 Product ranges and the design brief | 320 |
| 12.8 Design of waterproof and water repellent clothing | 328 |
| 12.9 Preparation for production, labelling and point of sale | 338 |
| 12.10 Looking ahead | 339 |
| Acknowledgments | 340 |
| References | 341 |
| Sources of further information | 344 |
